

## **2015 TRANSACTIONAL ANALYSIS RESIDENTIAL TRAINING WORKSHOP**

**Dates:** Saturday, 7 November, 12 noon, to Friday, 13 November, 5pm

**Venue:** Silverstream Retreat, in the Hutt Valley

The Residential Training workshop is a multi-level training in transactional analysis that has been offered in New Zealand for over 20 years on a bi-annual basis. As part of this tradition, tuition is provided voluntarily by the trainers to keep costs as low as possible.

This year the six-night residential event offers training for trainees and practitioners at all levels, including Certified Transactional Analysts, and provisional trainers and supervisors (PTSTAs), organized in a four-track structure.

1. The first track will be available to people enrolled in a CTA training course. Participants will work in small groups facilitated by a PTSTA trainer with a TSTA trainer present.
2. The second track will focus on exam preparation for both written and oral CTA examinations. Participants in this group will normally have completed three years of training and be actively working towards the CTA qualification.
3. The third track will be open to Certified Transactional Analysts or TA practitioners who have completed a minimum of five years training, and will focus on advanced professional development. Supervision and teaching will be provided by TSTAs only.
4. The fourth track provides training for PTSTAs. Participants will be expected to practice teaching and supervision skills by leading the CTA training groups, with live supervision from TSTAs.

Each day, there will be time spent together in a large process group, to build community through heightened awareness and dialogue, to think together, and for each individual to gain a deeper knowing of themselves and of others.

The training is primarily aimed at training psychotherapists. However, trainees from all four fields are welcome. There will be opportunities for practice exams at both the CTA and the TSTA levels. In addition, there will be space for teaching presentations from PTSTAs and TSTAs with panel discussions.
