

2016 Conference

Rupture - Repair - Restore

24th – 27th November 2016
Auckland, Aotearoa New Zealand

The phenomena of rupture, repair, and restoration are inherent to all human relational experience. As global and local citizens generally, and as practitioners of Transactional Analysis particularly, how do we conceptualise and utilise these processes in ways to co-create positive change?

ANZTAA invites you to participate in this year's conference, which offers seeds for contemplation and conversation about the hurt of rupture, the healing in repair and the hope restoration instils in our connections to the environment, communities, whanau/families, and within ourselves.

We have five key-note speakers, and are gathering workshop presenters, and group facilitators with a wealth of knowledge and experience to share with us, providing the opportunity for engaging together our thinking, feeling, spiritual selves in a call to action.

The venue for the conference is St. Francis Retreat Centre in Mt. Roskill, Auckland; a unique and beautiful location, with up to 39 single-rooms accommodation available. Total numbers are limited to 55 participants so register at early-bird rates to secure your room, and your place in the conference. Certificates of attendance will be available as record of training hours.

Registrations are now open
on the ANZTAA website here:
